DISREGARD DIRT

WASHING PASTES FOR HANDS

PRODUCT OVERVIEW

i-ofta

TACHOMETER

Isofa washes hands, where usual soaps are not enough. For the resistant dirt the line of industrial soaps SOAP and FOAM is ideal, then the effectivity of washing gradually increases with the products PRO, over HARD to strongest MAX. For easy orientation a tachometer is put to the label, which will show you a power of effect. Try on your own skin which line will suite you the best. Remember that with decreasing washing power the dermal tolerance is increasing.

3,5 KG
liquid paste

WORK ON MAXIMUM

Don't you care about how much will get dirty at your work? If you go on maximum, you must choose MAX. The most effective fighter against any kind of dirt you know. Including the most resistant dirt from printing industry, paint shops, services of heavy machinery etc.

GEAR

crucible with screw lid

quick lid with articulate pattern
does not slide in hands
more comfortable opening

only
1/4 of the turn
of the lid

crucible GEAR with screw lid

COMFORTABLE OPENING

Traditional packaging of pastes in crucibles - also the classic can be moved forward. Try the screw crucible, you will not want to return to the old-fashioned tipping lid. It's enough to turn the lid just only about of one quarter of the turn and the crucible is opened. Thanks to particulate pattern it does not slide in hands. No more uncomfortable tipping and arduous closing. Compact crucible easily fits to any washbasin.

„X“

solution for a small workshop

hygienical dosing
pump at each bottle
easy and quick fixing to the holder

Doses:
liquid pastes
liquid soaps
220x 
1 dose = 2,7 ml

bottle X with pump
wall holder X

SIMPLICITY

A pump is a part of each bottle X, thanks to which you will dose Isola easily and hygienically. X-Bottle can be easily fixed to wall with a simple holder. You can change this holder very easily for the former CLICK&GO! holder.

TEAM

solution for medium workshop

reliable plastic dispensers
refilling with soft pouch
saves environment

Doses:
foaming soaps
1300x
1 dose = 0,5 ml

Doses:
liquid soaps
325x
1 dose = 2 ml

soft pouch TEAM
liquid soap dispenser TEAM
foaming soap dispenser TEAM

RELIABLE COLLEAGUE

Abrasive free industrial soaps can be dosed by dispensers TEAM. You can refill them only with soft pouches with volume 650 g. Industrial soap provides up to 325 doses of thick and highly perfumed soap, FOAM provides up to 1300 doses of thick foam. Application TEAM is favourite for its reliability and simplicity. The soap in hermetically closed pouches is not possible to contaminate, it is a very high hygienical standard.

GROUP

solution for larger company

saves environment
hygienical dispensing
removable pouches into a plastic dispenser

Doses:
liquid pastes
liquid soaps

1214x
1 dose = from 1,4 ml

pouch GROUP
dispenser GROUP

MODERN WORKSHOP

Application GROUP provides you well designed and resistant dispenser. Using of bags enables you to save the nature, because after the consumption you remove just the bag without the dosing system. Soap and washing pastes are filled into hermetically closed pouches, which it is not possible to contaminate by any way. It is a very high hygienical standard and a solution for premises with high number of employees.

COMP

solution for corporate factory

stainless steel wall holder with lock
suitable for factories with huge number of employees

Doses:
liquid pastes
liquid soaps
up to 1750x
1 dose = 2 – 8 ml

Doses:
foaming soaps

5000x

1 dose = 0,7 ml

bottle COMP
holder COMP
pump COMP
pump COMP foaming

BIG WORKER

If you use washing pastes regularly or you have a lot of colleagues, the best choice for you is a bottle COMP. Big quantity of doses and its large volume will persuade you soon. Buy a pump which is everlasting, and you can use it with more bottles. Wall holder COMP looks „raw“ thanks to its stainless steel design and it is suitable to each workshop. You can choose holder with or without a lock. Attention! The pump for foaming soap FOAM is different from the other products.

lotion

CARE ABOUT SKIN

Using of hand creams is the necessary part of skin care, it is not enough only to wash the hands. To enable faster removing of dirt, use regularly liquid gloves before the work and use protective hand cream Isolda with content of bees wax after work. It hydrates the skin and is quickly absorbed by the skin. Dose it with pump „X“ or with dispensers TEAM and GROUP.
